

Program (ENG)

Our team put customer safety above all else, after you meet our guides you'll be kitted up with the security gear, which includes PFD and helmets provided by European safety standard.

Depending on the weather conditions, you may also be provided with neoprene shorts or neoprene long johns. You'll then have a safety briefing with your certified instructor who will show you how to use the equipment and how to avoid accidents.

He'll also talk to you about safety on the river, ensuring that everything is clear to all members of the rafting trip. Then you're off in the water for your rafting adventure!

You'll start off with a calm part of Cetina River where you can practice your paddling skills.

Your instructor will always be on hand should you require advice or guidance.

Once your instructor feels it is safe, you'll stop for a break so you have a rest or go swimming, cliff jumping or snorkelling.

At the end of multi-adventure tour there is 10 minutes of hill climb, where you'll be privy to some of the most beautiful views of the canyons.

Before your return your driver will take you to Gubavica waterfall (2 minutes from our finish point) where you can take some magnificent photos to complete your adventure day and share your experience with your friends.
